Standard Equipment

- Allows multiple tankless heaters to be mounted together, side-by-side, back-to-back, or both.
- Spacing of the rack system coincides with piping and venting kits, for additional ease of installation.
- Base and Extension Racks provide ability to customize systems.
- No limit to the number of Extension Racks allowed.

Base rack ST1249 can be used to hold one heater, or two heaters, back-to-back.

Base Rack ST1249

Extension rack ST1250 is used with the base rack, to add one or two heaters to the system, either side-by-side, or back-to-back.

Extension Rack ST1250

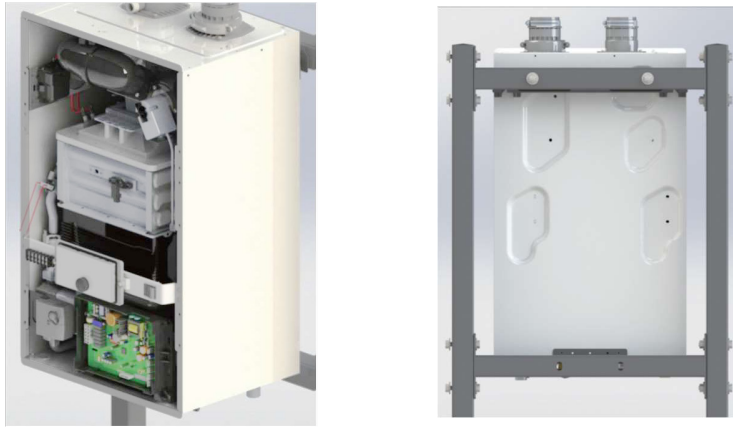

One Base Rack and one Extension Rack holds up to four heaters. More extension racks can be added, allowing for more heaters to be mounted together.

Mounted Single Heater

(showing one ST1249 Base Rack)

Two Heaters Mounted Back-to-Back

(showing one ST1249 Base Rack)

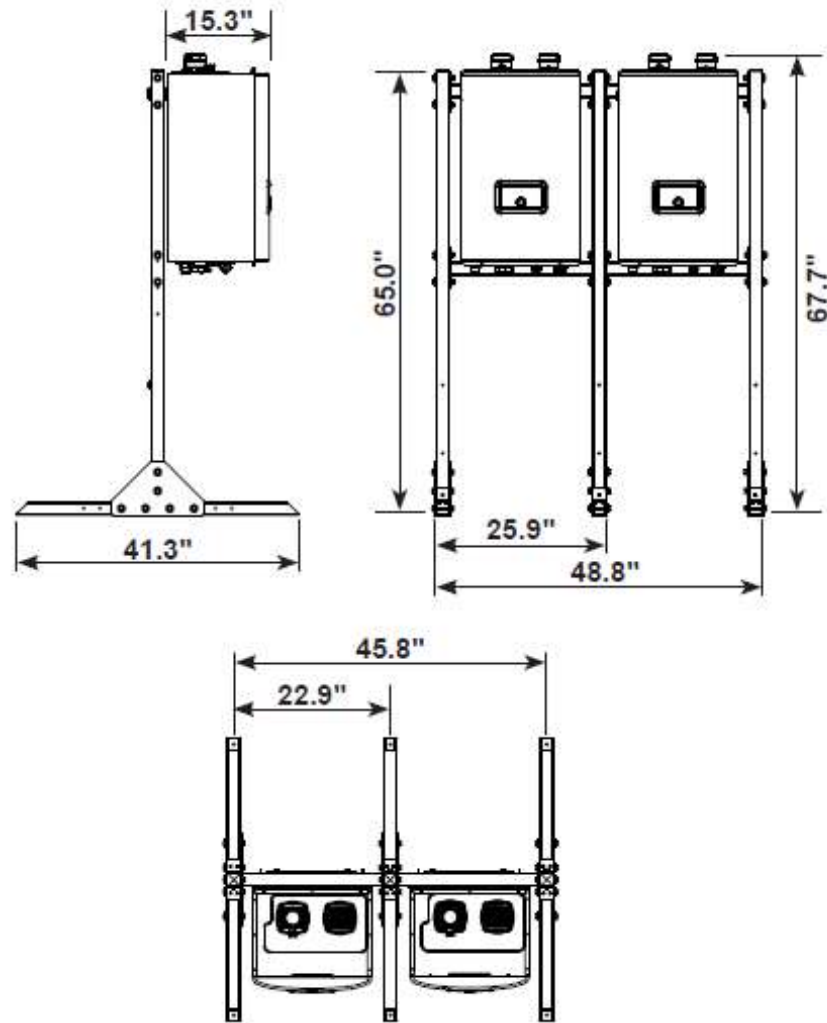

Four Heaters Mounted Back-to-Back

(showing one ST1249 Base Rack and one ST1250 Extension Rack)

Dimensions

Note: Drawing shows one Base Rack, one Extension Rack, and two heaters. For back-to-back installation, rear dimensions are identical to front dimensions. When more Extension Racks are added, the width dimension of each Extension Rack is added.
