COMPANY HISTORY

In 1948, engineer Avy Miller formed Laars Engineering as a company dedicated to the concept of heating water quickly by passing the water through finned copper tube heat exchangers. Miller realized that moving water at high velocity through “low-mass” heat exchangers such as finned copper tubing, could heat water up to nine times faster than through cast iron vessels. Miller designed specialized manufacturing techniques to support this new concept, and the “low-mass” technology found a warm reception in the U.S. market.

First applied to the swimming pool heater market that emerged rapidly in California after WWII, the heat exchanger designs that Laars developed also proved to work well with space-heating boilers and hot water boilers. After all, if a Laars heat exchanger could work well with swimming pool water with all of the chemicals and impurities, it could work even better with clean domestic hot water and closed loop hydronic systems.

The Laars heat exchangers with their higher velocity water flow also solved another problem — that of scale build-up in the tubes. By controlling flow rates, lime and scale were prevented from forming on tube walls, thereby keeping the heat transfer process clean and efficient.

Today, Laars Heating Systems operates as a subsidiary of the Bradford White Corporation with manufacturing in Rochester, NH and a distribution center in Mississauga, Ontario, Canada. Laars serves a diverse base of customers located in many countries all over the globe, and Laars product lines have expanded over the years to cover the large range from 50,000 to 5,000,000 BTU’s. Laars’ residential and commercial products serve the hydronic, radiant floor heating, volume water heating, and industrial process markets with over 20 different product lines and many accessories and controls to support these primary lines. 800.900.9276

Electronic Literature Downloads

- Sales Brochures
- Installation/Operating Manuals
- User's Manuals
- Specification Sheets
- Submittal Documents
- Technical Discussions
- Warranty Sheets

Printed Literature Ordering

- Printed literature can be ordered easily online at www.laars.com.

Product Videos

- Learn about the latest boiler technology directly from Laars factory experts.
- View our Service Videos to get information regarding cleaning and maintenance of our product lines.

Volume Water Heater Sizing

- Properly size and specify Laars Volume Water Heaters via the online Laars sizing tool!

Parts Identification

- The Laars Parts ID portal allows you to identify the correct parts needed for repairs based on serial number. Make sure you get the correct part every time!

Partner Area

- Representatives and distributors are allowed access to their account, order, and shipping information along with bulletin notices and updates. A very powerful way to track your business with Laars.

Training Classes

VISIT – WWW.LAARS.COM TODAY!

LAARS HEATING SYSTEMS CUSTOMER CENTER

The Laars Customer Center is designed to educate HVAC professionals on hydronic systems and Laars' current and next generation heating technology. Flexibility in training content and techniques was the primary focus when building the facility and curriculum; here you are the most important person in the building.

KEY FEATURES

- **70-seat tiered classroom** that can be used as one large room or divided into two 35-seat classrooms.
- **Hands-on training:** Laars boilers, water heaters, and pool heaters are located in front of each 35-seat classroom.
- **Live-fired boilers during training sessions:** continuously operated equipment right in training room with BTU's as high as 2 million.
- **State-of-the-art high-definition audio/video system:** Large screens above the equipment bays connect the classroom experience with the live-fired equipment.
- The projectors tie into **ceiling-mounted HD cameras** for **up-close views of the system components** for an **enhanced experience**.
- **The latest video conference hub technology:** Laars invested in cutting-edge equipment to provide live web-streaming of the training sessions and to record the classes for later viewing. This function offers flexibility for those that can't travel, and for follow-up training sessions after live sessions.
- A large **café with adjacent large outdoor patio** is located just off the main lobby for catered meals and socializing after training.

TYPICAL CLASS AGENDA

Tuesday: 8:00 am factory tour followed by presentations, live-fire demos, and hands-on troubleshooting
Dinner will be served Tuesday night in the LAARS Cafe

Wednesday: 8am to 1:00 pm, dismissal after lunch

Laars will cover hotel for 2 nights, breakfast and lunch on Tuesday and Wednesday plus dinner on Tuesday at the LAARS Café.

We offer custom classes to fit your group's specific needs for contractors and engineers, from basic through advanced training. Or sign up and train in one of our standard service training programs.

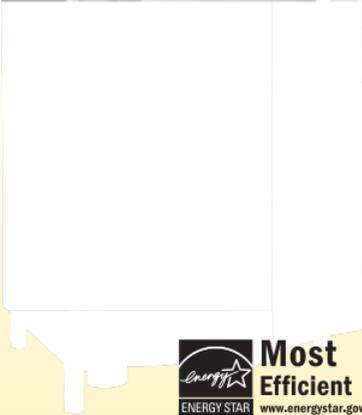

Standard service training is offered throughout the year, visit www.laars.com for details.

TYPICAL SERVICE TRAINING

Commercial Pennant and Mighty Therm2
Commercial and Residential NeoTherm

MASCOT[®] LX BOILER OR COMBINATION—WALL MOUNTED

The Mascot[®] LX is a wall mounted 50–220 MBH, space heating boiler. The 125, 150, and 175 MBH sizes are also offered as Combination Boilers to meet all of the heating and hot water needs of the smallest to largest homes.

- 95% AFUE efficiency
- Heating Sizes: 50, 75, 100, 125, 150, 175, and 220 MBH
- Combination Boiler Sizes: 125, 150, and 175 MBH
- Fully modulating 20% to 100%
- Quiet variable speed blower
- Pump Freeze Protection
- Ultra-Low NOx Emissions
- 2-year parts warranty
- 15-year heat exchanger warranty
- Natural or Propane Gas use
- Sleek, appliance-grade cabinet
- Lightweight, makes handling easy
- 150' of vent
- Stainless steel A.S.M.E. heat exchanger
- Stainless steel brazed plate DHW heat exchanger (combi models)
- Advanced water flow technology
- Laars integrated control system with temperature control, diagnostics, outdoor reset capability, and easy access for field wiring
- Unique, sealed condensate trap does not need to be primed at startup

MASCOT FT BOILER OR COMBINATION—WALL MOUNTED

The Mascot FT is a wall mounted 80 to 199 MBH space heating boiler. The larger sizes (120 - 199 MBH) are also offered as combination boilers to meet all of the heating and hot water needs of the smallest to largest homes. Powering the Mascot FT is an advanced fire tube heat exchanger that uses the latest in high efficiency, heating tube technology.

- 95% AFUE condensing efficiency
- Low pressure drop, fire tube heat exchanger design
- Modulation down to 20% of full fire (5:1 turndown)
- Low NOx system exceeds the most stringent regulations for air quality – 17ppm NOx
- Stainless steel heat exchanger with finned aluminum core fire tubes, welded construction
- Integrated stainless steel DHW indirect storage tank with priority for on-demand hot water
- Built-in condensate trap and drain, priming not required
- Blocked condensate pressure switch
- Electronic PID modulating control
- Direct spark ignition
- Customizable Freeze Protection
- Anti-short cycling
- Large user-interface and display
- Accepts external (0-10VDC) modulation signal
- Gas leak detection
- Outdoor reset (sensor included)
- Natural or Propane Gas use.
- Warranties: 10-Year limited* + 5-Year parts

Exhaust Vent and Air Inlet Collars fit standard 3" PVC piping.

Heating Only

Mascot FT COMBI BOILER—FLOOR STANDING

The Mascot FT is a combination (heating and domestic hot water) boiler packed with features that easily satisfy the space heating and hot water needs of the modern home. Powering the Mascot FT is an advanced fire tube heat exchanger that uses the latest in high efficiency, heating tube technology.

- 95% AFUE condensing efficiency
- Integrated stainless steel DHW indirect 3 gallon storage tank with priority for on-demand hot water
- Low pressure drop, fire tube heat exchanger design
- Modulation down to 20% of full fire (5:1 turndown)
- Low NOx system exceeds the most stringent regulations for air quality – 17ppm NOx
- Stainless steel heat exchanger with finned aluminum core fire tubes, welded construction
- Built-in condensate trap and drain, priming not required
- Blocked condensate pressure switch
- Electronic PID modulating control
- Direct spark ignition

MASCOT FT HYBRID WATER HEATER—WALL MOUNTED

The Mascot FT wall-mounted hybrid water heater is packed with features that easily satisfy hot water needs of the modern home. Powering the Mascot FT hybrid is an advanced fire tube heat exchanger that has 3.5 gallons of hot water available at all times.

- 95% thermal efficiency
- 5:1 Modulation
- Environmentally Friendly
- Low NOx emissions
- Vent up to 100 ft in PVC, CPVC & Polypropylene
- Natural Gas and Propane Models
- Easy-to-use dial and push button input system with large backlit display
- Functions are clearly displayed for quick set-up and diagnostics
- Quick access buttons for temperature control and status functions
- Rebate Eligible - check federal, state and local rebates
- Clean Burning Burner
- High Performance Blower
- Modulating Gas Valve
- Advanced Fire Tube Heat Exchanger
- Laars Integrated Control
- Warranties: 12-Year limited* + 5-Year parts

*When used in a residential application

MASCOT ST TANKLESS WATER HEATER—WALL MOUNTED

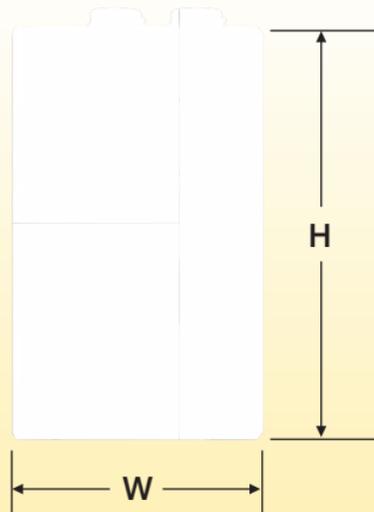

The Mascot ST is a wall mounted condensing tankless water heater packed with features. An advanced stainless steel condensing heat exchanger using the latest in combustion technology powers the Mascot ST. The heat transfer tubes are constructed with corrosion-resistant stainless steel and are precisely aligned to maximize heat transfer.

- 0.96 Energy Factor
- 10:1 Modulation
- Environmentally Friendly
- Low NOx Emissions
- Reliable Stainless Steel Condensing Heat Exchanger
- Vent up to 100ft in PVC, CPVC & Polypropylene
- Natural Gas & Propane Models
- Easy-to-use dial and push button input system with large backlit display
- Functions are clearly displayed for quick setup and diagnostics
- Quick access buttons for temperature control and status functions
- Rebate Eligible - check federal, state and local rebates
- High Performance Blower
- Automatic Air Gas Mixer
- Advanced Condensing Heat Exchanger
- Laars Integrated Control
- Clean Burning Burner
- Warranties: 12-Year limited* + 5-Year parts

*When used in a residential application

Exhaust Vent and Air Inlet Collars fit standard 3" PVC piping.

The Mini-Therm® JVS boilers are well-known for economy, durability, and the capacity to keep the largest homes comfortable on the coldest days.

- Spark ignition
- Efficient up to 85% AFUE
- Built-in draft diverter and automatic vent
- Low-mass heat exchanger results in super-quick heating response
- Very compact to save space
- Easy to install, reliable, and proven in the field over many years
- Has a unique hybrid and two-pass heat exchanger design
- 20-Year pro-rated heat exchanger warranty

MINI-THERM® JVH BOILER

Ideal for new homes or replacement boilers, the Mini-Therm® JVH is efficient, saving energy and money. The JVH boiler is equipped with a draft blower that permits side-wall or chimney venting and uses H.S.I. (hot surface ignition) to operate all six sizes.

- Hot surface ignition system
- Up to 83% AFUE
- Single-stage on/off firing mode
- Equipped with a blower
- Can be side-wall or chimney vented
- Compact models offer small footprint
- Easy to install, operate and maintain
- Has a unique hybrid and 2 pass heat exchanger design
- 20-Year pro-rated heat exchanger warranty

Dimensions shown in inches *cm*

ENDURANCE COMBINATION BOILER/WATER HEATER

Endurance is a gas-fired, fully modulating, sealed combustion combination boiler/water heater offered in two sizes: the 110 modulates from 61,800 to 108,200 BTU/hr., and the 175 modulates from 102,900 to 175,300 BTU/hr.

- 85%+ A.F.U.E
- Features a 20-gallon tank, heat exchanger, and low limit control
- Design certified and tested to ANSI standard Z21.13
- Designed and constructed in accordance with the ASME Boiler & Pressure Vessel Code, Sections II, IV, and IX
- Maximum working pressure — water 30 psi, ASME rated
- Hydrostatic test pressure at factory — 60 psi
- Natural or propane gas
- Minimum gas supply pressure — 4" w.c.
- Maximum gas supply pressure — 13" w.c.
- Sealed stainless steel combustion chamber
- Hot surface ignition
- Automatic burner modulation from 57% to full fire
- NOx levels less than 25ppm
- Venting – Direct vent (sealed combustion with ducted combustion air in concentric vent) or Category IV
- Warranties: 20-Year heat exchanger + 10-Year tank warranty + 1-Year parts

Dimensions shown in inches *cm*

For complete product details and dimensions go to <http://www.laars.com/document-downloads/submittal-documents.aspx>

MINIMUM CLEARANCES

- Direct Vent
SEALED COMBUSTION
- Utilizes outside air for combustion.
 - Horizontal vent lengths up to 15' with three 90° bends.

- Optional Vent Terminal-Direct Vent:
- For vent locations less than 16½" above grade.

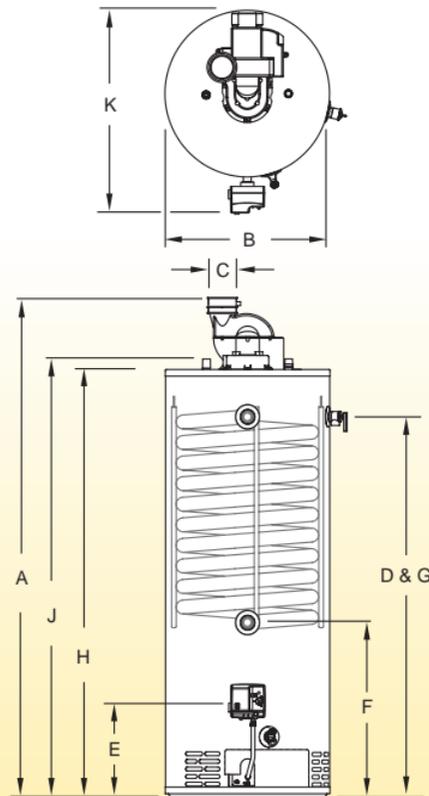

- Alternative Vent
- Horizontal and vertical venting.
 - Up to 50 equivalent feet.
 - Can take combustion air from outside or from inside space.
 - Vent material must meet code UL1738 (US) or ULC636 (Canada).

LAARS® COMBI HEAT™ WATER HEATERS

Laars® Combi Heat™ provides home space heating and potable hot water from a single energy-saving source. Combi Heat™ features a glass-coated, double-wall heat exchanger coil and is available in capacities of 50 and 75-gallons.

- Heat Exchanger is double wall, 1-1/2" O.D. glass coated steel coil
- Double wall coil ensures separation of potable water and heating fluid
- Up to 10 GPM flow, with less than 5 ft. of heat exchanger head loss
- Exclusive enamel tank and heat exchanger lining provides superior protection
- Fully Automatic Controls with built-in energy cut-off switch
- Built-in gas pressure regulation
- Heavy gauge steel automatically formed, rolled, and welded
- Thermostatic Mixing Valve supplied with unit
- Protective aluminum anode rod helps prevent corrosion
- Flue baffle maximizes heat absorption in tank and retards standby heat loss
- Factory-installed water inlet sediment reducing device prevents build up in tank
- 3/4" NPT factory-installed true dielectric waterway fittings to extend water heater life
- 2" Non-CFC foam insulation
- T&P Relief Valve installed
- Brass Drain Valve
- Design-Certified by CSA International
- 50-gallon model is FVIR compliant
- Warranties: 10-Year heat exchanger + 6-Year parts

LAARS® COMBI HEAT™ PV WATER HEATERS

Combi Heat™ PV (power-vented) water heaters feature a glass-coated, double-wall heat exchanger coil. These combination water and space heating products provide home space heating and potable hot water from a single energy-saving source.

- Heat Exchanger is double wall, 1-1/2" O.D. glass-coated steel coil
- Double wall coil ensures separation of potable water and heating fluid
- Powerful and quiet blower motor has high torque to minimize venting issues
- Spark to pilot ignition system
- Up to 10 GPM flow, with less than 5 ft. of heat exchanger head loss
- Exclusive enamel tank and heat exchanger lining provides superior protection
- Electronic Gas valve offers precise temperature control for higher first hour delivery
- Horizontal and vertical venting
- Electronic control LED display to aid in start-up and diagnostics
- Built-in gas pressure regulation
- Heavy gauge steel automatically formed, rolled, and welded
- Thermostatic Mixing Valve supplied with unit
- Protective aluminum anode rod helps prevent corrosion
- Flue baffle maximizes heat absorption in tank and retards standby heat loss
- Factory-installed water inlet sediment reducing device prevents build-up in tank
- 3/4" NPT factory-installed true dielectric waterway fittings to extend water heater life
- 2" Non-CFC foam insulation
- T&P Relief Valve installed
- Brass Drain Valve
- Design-Certified by CSA International
- 50-gallon model is FVIR compliant
- Warranties: 10-Year heat exchanger + 6-Year parts

The ingenious Laars-Stor[®] single wall was engineered to provide the lowest pressure drop, the highest hot water output, and the highest amount of effective actual heat transfer area of any indirect fired water heater in the industry.

- Single-Wall 1 1/2" O.D. enamel-coated heat exchanger (carbon steel coil)
- Coil with heat transfer area of 14.2 sq. ft. and a stored water volume of 2.7 Gal.
- Factory-installed sediment-reducing device helps to minimize build-up in tank
- Exclusive enamel lining formula for tank and heat exchanger provides superior protection
- Fast-acting Honeywell immersion aquastat for automatic temperature control
- 1" NPT supply and return connections are located on front of water heater
- 3/4" NPT factory-installed true dielectric fittings extend water heater life
- Three protective aluminum anode rods provide added protection
- T&P relief valve included
- Low restriction brass drain valve
- 2" Non-CFC foam insulation
- Warranties: 5-Year tank and 1 Year parts

LAARS-Stor[®] COMMERCIAL SINGLE-WALL INDIRECT WATER HEATER 30

Laars-Stor[®] single wall commercial models incorporate a super-efficient heat exchanger. Made of 1.5" diameter carbon steel tubing and coated with a glass-lining, it has a total heat surface area of 27.2 square feet.

- Single-Wall 1-1/2" O.D. enamel-coated heat exchanger (carbon steel coil)
- Coil with heat transfer area of 27.2 sq. ft. has a stored water volume of 5.0 Gal.
- Factory-installed sediment-reducing device helps to minimize build-up in tank
- Exclusive enamel lining formula for tank and heat exchanger provides superior protection
- Fast-acting Honeywell immersion aquastat for automatic temperature control
- 1" NPT supply and return connections are located on front of water heater
- 1" NPT factory-installed true dielectric fittings extend water heater life
- Three protective aluminum anode rods provide added protection
- T&P relief valve included
- Low restriction brass drain valve
- 2" Non-CFC foam insulation
- Warranties: 5-Year tank and 1-Year parts

The Laars-Stor2™ features a patented double-wall carbon steel heat exchanger coil coated with a glass-lining for corrosion resistance and long life. The Laars-Stor2™ supplies a first hour rating of 120 to 158 gallons per hour.

- Double wall 1-1/2" O.D. glass-coated steel coil heat exchanger with positive leak path
- Low Heat Exchanger Head Loss — up to 10 GPM flow with less than 5 ft. of head loss
- Factory-installed sediment-reducing device helps to minimize build-up in tank
- Heavy gauge steel tank automatically formed, rolled, and welded
- Exclusive enamel lining formula provides superior tank protection
- Fast-acting surface-mount thermostat for automatic temperature control
- 3/4" NPT supply and return connections are located on front of water heater
- 3/4" NPT factory-installed true dielectric fittings extend water heater life
- Two protective aluminum anode rods provide added protection
- Standby heat loss is less than 1/2°F per hour (ASHRAE 90.1b current standard)
- T&P relief valve included
- Low restriction brass drain valve
- 2" Non-CFC foam insulation
- Warranties: Limited lifetime tank and heat exchanger + 6-Year limited parts

LAARS-Stor[®] SS STAINLESS STEEL INDIRECT WATER HEATER

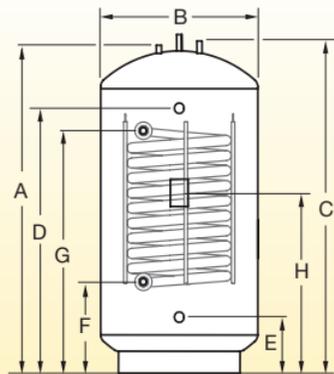

The Laars-Stor[®] SS utilizes a superior grade of stainless steel for the tank and the heat transfer coil. This construction is lightweight and also resists pitting while minimizing intergranular and stress corrosion. The Laars-Stor[®] SS models provide superior thermal conductivity for higher efficiency.

- Stainless steel tank and heat exchanger made from chromium molybdenum — titanium ferritic 444 stainless steel alloy
- 3/4" NPT female supply and return connections on front of water heater
- 1" NPT connections on LS-RTV-120-L
- Standby Heat loss less than 1/2°F per hour
- Brass Drain/Return Valve
- T&P Relief Valve Opening — all models have special tapping on top of tank.
- Form fitted and molded CFC-Free Polystyrene Insulation
- Steel Jacket
- Warranties: Limited lifetime tank and heat exchanger + 1-Year limited parts*

U.H.E.™ COMMERCIAL WATER HEATER

Laars® U.H.E.™ has a remarkable thermal efficiency rating, as high as 99.1% — that makes this line of commercial water heaters the most efficient in its class. In addition, the Laars® U.H.E.™ is second-to-none in installation flexibility.

- Thermal Efficiency up to 99.1%
- Integrated Control system combines temperature control, diagnostic codes, and system ignition functions
- Direct Spark Ignition for improved operational dependability and durability.
- Premix Power Burner automatically increases or decreases fuel flow when a change in combustion air is detected
- Flexible venting vertically or horizontally with either 3" or 4" PVC, CPVC or ABS (not approved for Canada) vent pipe
- Approved for direct vent closed combustion applications approved for unbalanced venting
- 1" NPT side connections for space heating
- Sanitizing capability — temperature setting up to 180°F (82°C).
- Low NOx construction standard.
- ASME Code available on all models
- Three pass flue system — combustion gases moving at a high velocity.
- Submerged combustion chamber minimizes radiant heat loss and improves efficiency.
- Zero Inch Clearance for unsurpassed installation flexibility.
- Warranties: 3-Year tank + 1-Year parts

High in efficiency and low in emissions, the NeoTherm® condensing boiler from Laars Heating Systems is a fully packaged, space-saving hydronic solution. ENERGY STAR® Most Efficient rated, NeoTherm® offers 95%+ A.F.U.E. to make it everything a modern boiler should be — easy-to-use, easy on the environment, powerful, and compact.

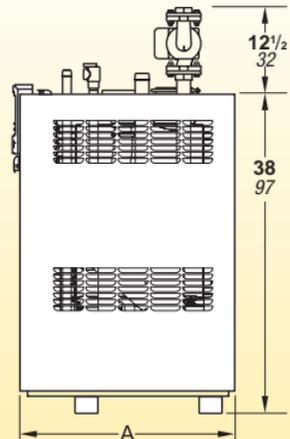

- Floor standing condensing boiler
- All connections are on top of unit
- Stainless steel heat exchanger
- Rated for alcove and closet installations
- Will qualify for Energy Rebates
- 95%+ AFUE
- Sealed combustion chamber
- Pre-mix stainless steel burner
- LAARS Integrated Control SystemSM
- 80 to 210MBH sizes
- Low NOx system exceeds the most stringent regulations for air quality — 10ppm NOx
- Horizontal or vertical direct vent
- Easy to use and easy on the environment
- Easy to service
- Warranties: 12-Year heat exchanger + 2-year parts

The NeoTherm commercial boiler is a direct vent, sealed combustion, condensing hydronic boiler with 95%+ thermal efficiency that modulates with a 5 to 1 turndown. It features an ASME stainless steel heat exchanger, spark ignition system, and low NOx emissions.

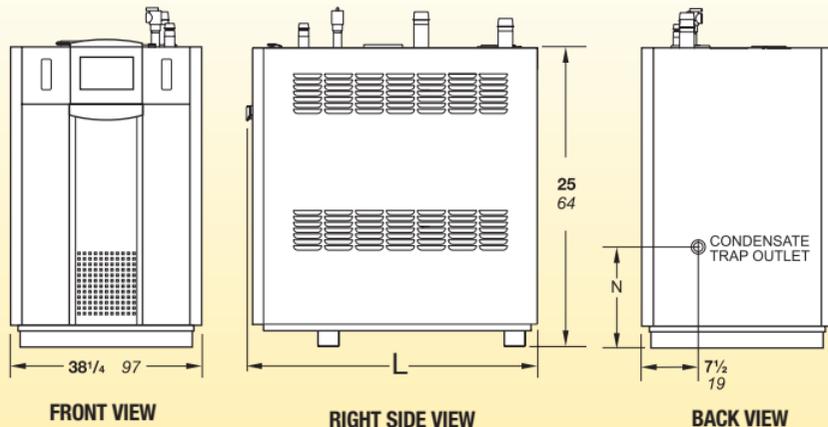

- Pre-mix stainless steel burner
- Large color touch screen
- 285 to 850MBH sizes
- Stainless steel heat exchanger with welded construction
- Low NOx system exceeds the most stringent regulations for air quality — 10 ppm NOx
- Horizontal or vertical direct vent
- Communicates with Building Automation Systems
- Vent and air pipe lengths of up to 100 equivalent feet (each)
- Built-in condensate trap
- Vent temperature cutoff feature
- Direct spark ignition system
- Indirect water heater priority
- Sensor for indirect domestic water tank
- 160 psi maximum working pressure
- Warranties: 10-year heat exchanger + 1-year parts

- High condensing efficiency
- Modulation down to 20% of full fire (5:1 turndown)
- Sealed combustion chamber

NEOTHERM® VOLUME WATER HEATER

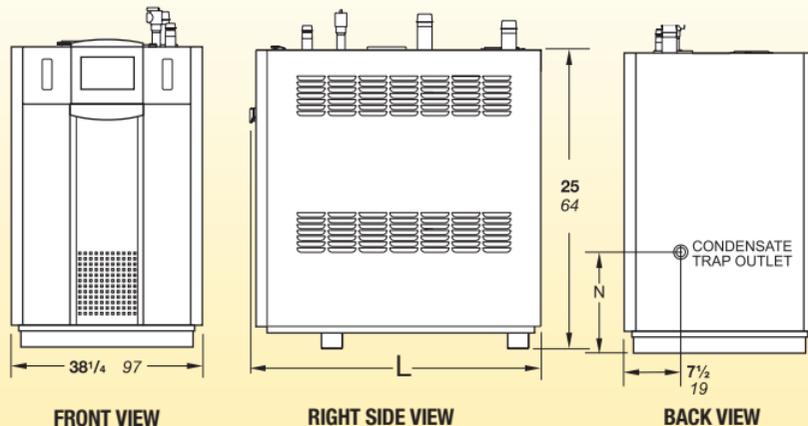

NeoTherm® is a direct vent, sealed combustion, volume water heater with very high efficiency (95%+). It features an ASME stainless steel heat exchanger, spark ignition system, and low NOx emissions for a package that's easy to use and easy on the environment.

- Easy to service
- Low NOx system (10ppm) exceeds the most stringent regulations for air quality
- Large color touch screen
- LAARS Integrated Control SystemSM
- Communicates with Building Automation Systems
- High-condensing efficiency
- 150 to 850MBH sizes
- Modulation down to 20% of full fire (5:1 turndown)
- Sealed combustion chamber
- Pre-mix stainless steel burner
- Horizontal or vertical direct vent
- Horizontal vent and air terminals
- Vent and air pipe lengths of up to 100 equivalent feet (each)
- Warranties: 8-Year pro-rated heat exchanger + 1-year parts

- All connections are on top of unit
- Stainless steel heat exchanger

BOILER

The NeoTherm commercial boiler is a direct vent, sealed combustion, condensing hydronic boiler with 95%+ thermal efficiency that modulates with a 5 to 1 turndown. It features an ASME stainless steel heat exchanger, spark ignition system, and low NOx emissions.

- Large color touch screen
- 285 to 850MBH sizes
- Stainless steel heat exchanger with welded construction
- Low NOx system exceeds the most stringent regulations for air quality — 10 ppm NOx
- Horizontal or vertical direct vent
- Communicates with Building Automation Systems
- Vent and air pipe lengths of up to 100 equivalent feet (each)
- Built-in condensate trap
- Vent temperature cutoff feature
- Direct spark ignition system
- Indirect water heater priority
- Sensor for indirect domestic water tank
- 160 psi maximum working pressure
- Warranties: 10-year heat exchanger + 1-year parts

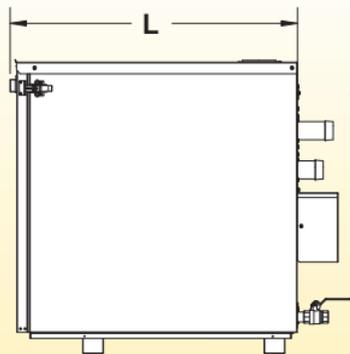

- High condensing efficiency
- Modulation down to 20% of full fire (5:1 turndown)
- Meets ANSI Z21.13-2013, section 5.26 boilers for outdoor installations
- Sealed combustion chamber
- Pre-mix stainless steel burner

NEOTHERM® OUTDOOR, VOLUME WATER HEATER

NeoTherm® is a direct vent, sealed combustion, volume water heater with very high efficiency (95%+). It features an ASME stainless steel heat exchanger, spark ignition system, and low NOx emissions for a package that's easy to use and easy on the environment.

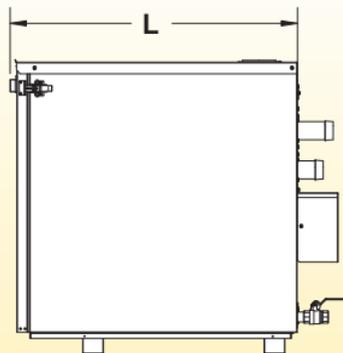

- Stainless steel heat exchanger
- Meets ANSI Z21.13-2013, section 5.24 wind test and section 5.30 rain test

- Easy to service
- Low NOx system (10ppm) exceeds the most stringent regulations for air quality
- Large color touch screen
- LAARS Integrated Control SystemSM
- Communicates with Building Automation Systems
- High-condensing efficiency
- 150 to 850MBH sizes
- Modulation down to 20% of full fire (5:1 turndown)
- Sealed combustion chamber
- Pre-mix stainless steel burner
- Horizontal or vertical direct vent
- Horizontal vent and air terminals
- Vent and air pipe lengths of up to 100 equivalent feet (each)
- Warranties: 8-Year pro-rated heat exchanger + 1-year parts

The Laars MagnaTherm[®] Commercial Modulating Condensing Boiler has everything to satisfy large input commercial applications. The unique VARI-PRIME[™] variable speed boiler pump control optimizes three major variables of boiler operation: combustion, blower, and boiler pump efficiencies.

- Meets the most stringent NOx emission requirements
- Up to 99% thermal efficiency, condensing operation
- Indoor/Outdoor installation
- Large color touch screen allows for easy control and setup
- VARI-PRIME[™] variable speed pump control matches system pump with boiler modulation to optimize efficiency
- Small footprint, slim vertical design, and removable top section help it fit into tight spots
- Forward mounted low voltage panel for easy wiring and troubleshooting
- Unique, sealed condensate trap does not need to be primed at startup
- Single or up to 8 boilers in a cascade installation
- Up to 100 feet of vent
- 439 Stainless Steel Heat Exchanger for increased corrosion resistance
- Advanced control system with temperature control, diagnostics, outdoor reset capability, and easy access for field wiring
- Warranties: 10-Year heat exchanger + 1-Year parts

The Mighty Therm[®] 2, 200 – 400 series boiler operates at an environmentally friendly 85% efficiency with low NOx emissions. Easy to use, install, and maintain, it utilizes basic cap and bulb temperature controls and a low voltage terminal strip for simple troubleshooting.

- Operates in altitudes up to 10,000 feet
- Ambient temperatures from -40°F to +140°F
- Tolerant of glycol systems
- Waterways able to operate in a maximum water hardness of 17 gpg
- Hydronic models supply temps from 130°F to 240°F
- Heat exchanger is removable from top, back, or front
- Washable air filter
- Gas supply right or left side (field convertible)
- Maintains efficiency and low NOx levels at low and high fire
- Fan-assisted combustion system
- Warranties: 10-Year heat exchanger + 1-Year parts

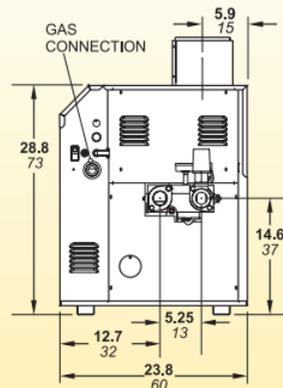

- Glass-lined cast iron or bronze headers and non-ferrous waterways.
- 10 finned tube heat exchanger design for quick and efficient heat transfer
- 85% Combustion efficiency, 84% Thermal efficiency
- NOx below 10 ppm
- 2-stage firing
- Immune to thermal shock down to 30°F

VOLUME WATER HEATER

The Mighty Therm[®] 2, 200 – 400 series volume water heater operates at an environmentally friendly 85% efficiency with low NOx emissions. Easy to use, install, and maintain, it utilizes basic cap and bulb temperature controls and a low voltage terminal strip for simple troubleshooting.

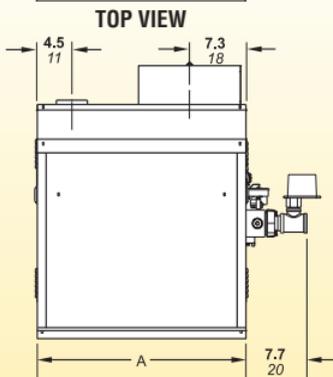

- Volume water heater models supply temps from 130°F to 200°F
- Heat exchanger is removable from top, back, or front
- Washable air filter
- Gas supply right or left side (field convertible)
- Maintains efficiency and low NOx levels at low and high fire
- Fan-assisted combustion system
- Warranties: 10-Year heat exchanger + 1-Year parts

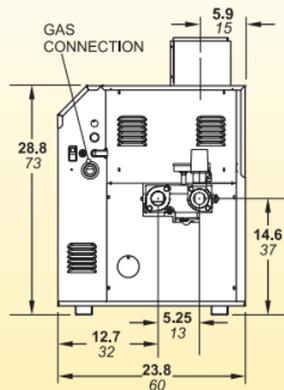

- 85% Combustion efficiency, 85% Thermal efficiency
- NOx below 10 ppm
- 2-stage firing
- Immune to thermal shock down to 30°F
- Operates in altitudes up to 10,000 feet
- Ambient temperatures from -40°F to +140°F
- Tolerant of glycol systems
- Waterways able to operate in a maximum water hardness of 17 gpg

MIGHTY THERM[®] 2 COMMERCIAL HYDRONIC BOILER

The Mighty Therm[®]2 boiler has been specifically designed to meet the needs of the replacement market by offering simple and straightforward controls with 2-stage firing. It features modular construction that separates the burner trays, gas train, and blower assembly.

- Glass-lined cast iron or bronze headers and non-ferrous waterways.
- 10 finned tube heat exchanger design for quick and efficient heat transfer
- 85% Combustion efficiency, 84% Thermal efficiency
- NO_x below 10 ppm
- 2-stage firing
- Immune to thermal shock down to 30°F
- Operates in altitudes up to 10,000 feet

- Ambient temperatures from -40°F to +140°F
- Tolerant of glycol systems
- Waterways able to operate in a maximum water hardness of 17 gpg
- Hydronic models supply temps from 130°F to 240°F
- Heat exchanger is removable from top, back, or front
- Washable air filter
- Gas supply right or left side (field convertible)
- Maintains efficiency and low NO_x levels at low and high fire
- Fan-assisted combustion system
- Warranties: 10-Year heat exchanger + 1-Year parts

The Pennant[®] line of fan-assisted, modular boilers ranks among the industry's most versatile and environmentally friendly systems for hydronic applications. Available in 7 sizes from 500 to 2000 MBTU/h, Pennant[®] boilers deliver efficiency levels up to 85%.

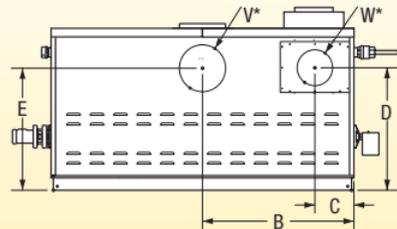

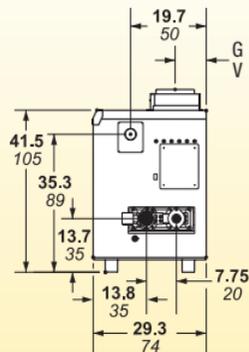

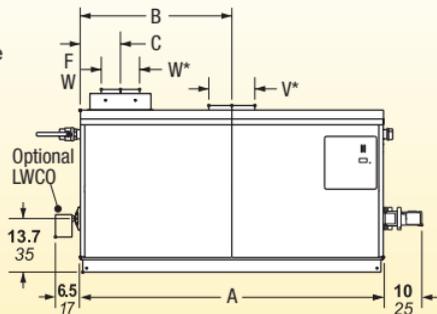

- 85% efficiency
- NOx below 10 ppm
- 2-stage, 3-stage, and 4-stage firing
- Immune to thermal shock down to 30°F
- Operates in altitudes up to 10,000 feet
- Ambient temperatures from -40°F to +140°F

- Tolerant of glycol systems
- Waterways able to operate in a maximum water hardness of 17 gpg
- Hydronic Models supply temps from 125°F to 220°F
- Modular construction: burner trays, gas train, blower assembly
- Glass-lined cast iron or bronze headers
- Heat exchanger uses efficient 10 finned-tube design
- Lightweight insulation
- Warranties: 10-Year heat exchanger + 1-Year parts

Non pump-mounted unit shown.

LOW-TEMP PENNANT® LOW TEMPERATURE BOILER AND VOLUME WATER HEATERS

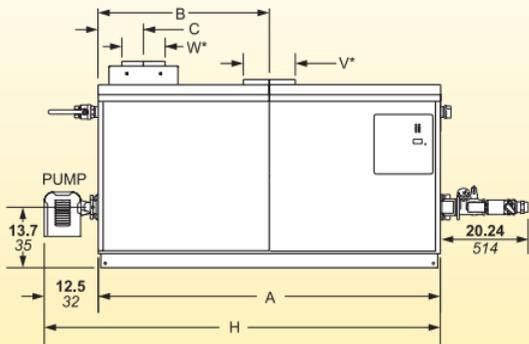

The Low Return Water Temperature Pennant® commercial boiler and volume water heaters eliminate the problem of condensation shortening the life of the heat exchanger. A factory mounted three-way valve and an automatic bypass system help to maintain a minimum boiler return temperature.

- Boiler operating control of 120°F (49°C).
- Heat exchanger condensation is prevented
- Long boiler life, even with rapid swings in the return water temperature
- Operates successfully with return water temperatures as low as 70°F (21°C)

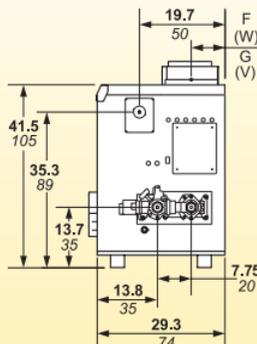

- Seven sizes available from 500 – 2,000MBH
- Perfect for backup to heat pump systems, radiant floor heating, snow melting systems, and low-temp baseboard systems
- Warranties: 10-Year heat exchanger + 1-Year parts

This solidly constructed rack system allows the stacking of two Pennant units, in-line without offset and accommodates venting and piping configurations. Pennant models with pumps mounted can be applied and will overhang on sides of rack.

- Maximizes floor space
- Doubles the heating capacity per square foot of floor space
- Easy to assemble
- Works with Pennant Hydronic Boilers or Volume Water Heaters
- Stack two units in-line without offset
- Accommodates venting and piping configurations
- Construction meets or exceeds California requirements and is Seismic Approved and Certified

W is inside dimension.

Note: Models with pumps mounted can be applied and will overhang on sides of rack.

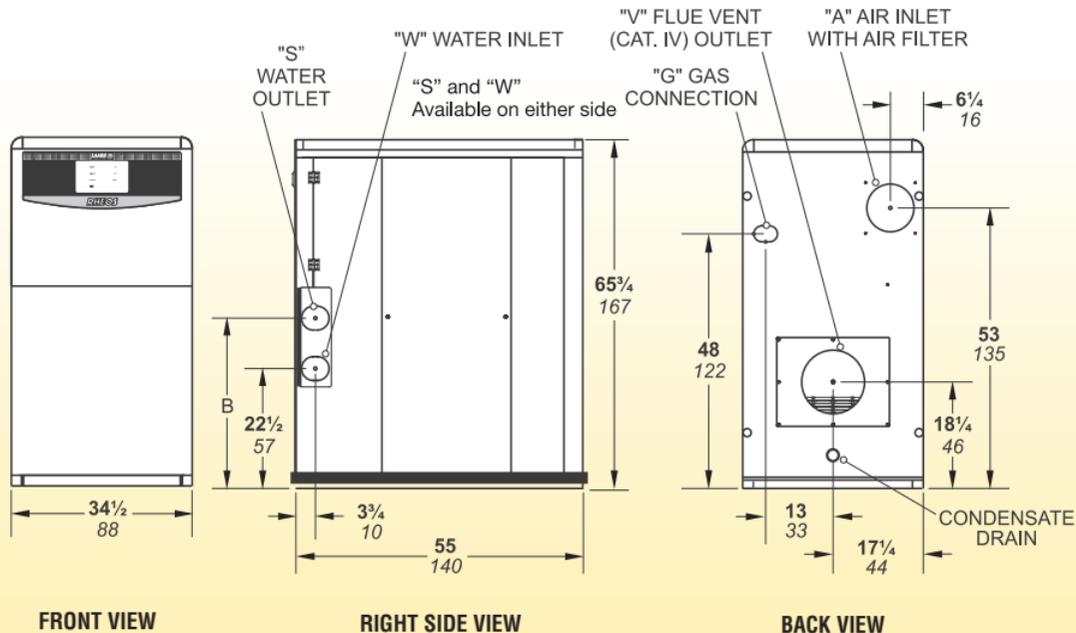

Rheos® boiler technology uses precise modulation electronics that sense conditions and automatically adjust the boiler performance to meet the required heating load. The Rheos® efficiency can cut fuel costs by as much as 30% over traditional boilers. Comes in 1200-2400 MBH.

- Manual reset high-limit
- Fits through a 36" doorway
- High gas pressure switch
- Low gas pressure switch
- Air pressure switch
- ASME CSD-1
- Water flow switch
- Vertical or horizontal venting options (Category IV)
- Pump time delay
- Low-fire start time delay
- 160 lb. w.p. heat exchanger
- 75 psi pressure relief valve (boiler)
- Warranties: 10-Year heat exchanger + 1-Year parts

- Modulating proportional firing control system (50-100%)
- All waterways are copper or glass-lined
- Low-water cutoff with test light and manual reset button

RHEOS[®] COMMERCIAL VOLUME WATER HEATER

The Rheos[®] volume water heater is a compact high-efficiency, low-cost system for commercial water heating installations requiring up to 2400 MBH.

- Manual reset high-limit
 - Fits through a 36" doorway
 - High gas pressure switch
 - Low gas pressure switch
 - Air pressure switch
 - ASME CSD-1
 - Water flow switch
 - Vertical or horizontal venting options (Category IV)
 - Pump time delay

- Nine sizes available 500 – 1825MBH inputs
- Natural or propane gas models
- Electronic ignition
- Built-in draft diverter to simplify installation

Energy efficient and compact, Mighty Therm® Model AP indoor pool heating boilers (500 – 1825MBH) are designed for commercial, institutional, and large residential pools where economical performance and rapid heat-up are needed.

- Flow switch standard on all models
- Integral pump assures proper water flow
- Automatic gas valve
- Stainless steel burners, with slide-out burner tray for easy maintenance
- Electronic flame supervision
- Galvanized steel jacket with acrylic finish for long life
- High temperature refractory firebox liner — to 2000°F for greater efficiency
- Integral header flanges for easier serviceability
- Glass-lined or bronze headers for corrosion resistance
- Integral lined copper tube heat exchanger
- Warranties: 5-Year heat exchanger + 1-Year parts

Notes: 1. For high altitude pools, reduce the surface area figures shown in the charts by 4% for each 1000 ft. above sea level. (No derating is necessary up to 2000 ft. above sea level.) 2. Laars maintains a policy of continuous improvements and therefore reserves the right to change specifications without notice. 3. Sizing for outdoor pools is based on 3 1/2 mph average wind.

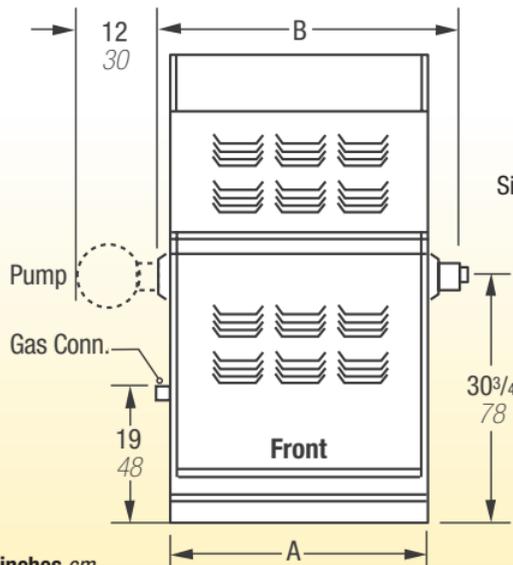

For complete product details and dimensions go to <http://www.laars.com/document-downloads/submittal-documents.aspx>

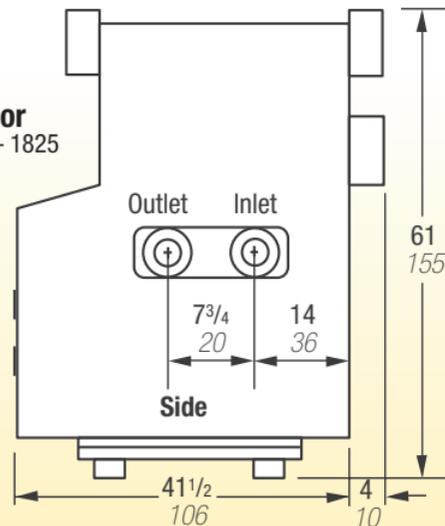

Energy efficient and compact, Mighty Therm[®] Model AP outdoor pool heating boilers (500 – 1825MBH) are designed for commercial, institutional, and large residential pools where economical performance and rapid heat-up are needed.

- Nine sizes available 500 – 1825MBH inputs
- Natural or propane gas models
- Electronic ignition
- Built-in draft diverter to simplify installation
- Flow switch standard on all models
- Integral pump assures proper water flow

- Automatic gas valve
- Stainless steel burners, with slide-out burner tray for easy maintenance
- Electronic flame supervision
- Galvanized steel jacket with acrylic finish for long life
- High temperature refractory firebox liner — to 2000°F for greater efficiency
- Integral header flanges for easier serviceability
- Glass-lined or bronze headers for corrosion resistance
- Integral lined copper tube heat exchanger
- Warranties: 5-Year heat exchanger + 1-Year parts

MIGHTY THERM[®] 2 POOL COMMERCIAL INDOOR/OUTDOOR POOL HEATER

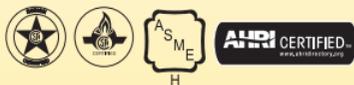

Mighty Therm[®]2 ranks among the industry's most versatile and environmentally friendly systems for superior pool heating. Available in 7 sizes from 500 to 2000 MBH, Mighty Therm[®]2 pool heaters run reliably on natural or LP gas and deliver exceptional efficiency levels. The systems are also among the "greenest" in the industry with NOx emissions below 10 ppm.

- Indoor/Outdoor construction
- Immune to thermal shock down to 30°F
- Operates in altitudes up to 10,000 feet
- Ambient temperatures from -40°F to +140°F
- Waterways able to operate in a maximum water hardness of 17 gpg
- Factory-mounted pump sized for heat exchanger, 30 feet of pipe and 3 elbows total pressure drop
- Fan-assisted combustion system
- 120vac, 60 Hz single phase power
- Modular construction: burner trays,

- gas train, blower assembly
- Thermostatic mixing valve
- Heat exchanger uses efficient 10 finned tube design
- Category III (horizontal) venting, up to 50 feet with 3 elbows, without additional fans
- Washable air filter
- Wiring terminal strip makes electrical troubleshooting easy
- Easy access to igniter via special service panel
- Easy-to-service burner assembly
- Warranties: 5-Year limited + 1-Year parts

PENNANT® COMMERCIAL POOL HEATER

The Pennant® line of high-performance commercial pool heating boilers from LAARS delivers efficiency levels of 85% or more. NOx emissions are among the lowest in the industry at 10 ppm.

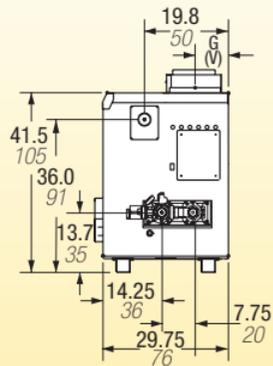

- Installs indoors or outdoors
- Automatic bypass system is factory pre-set — no field adjustments required
- Reversible vent and intake air terminals
- Separate field wiring terminal panel
- Front panel diagnostics
- Optional rack-mounting
- Reversible gas and water connections
- Warranties: 5-Year limited + 1-Year parts

- Available in 500, 750, 1000, 1250, 1500, 1750, 2000MBH inputs
- Built-in automatic mixing system to help eliminate condensation in the heat exchanger
- Allows return water temperatures as low as 60° without condensation
- Standard Backwash Switch
- Uses room air or outside air for combustion
- Vents into a chimney or through a side-wall

The Vari-Prime™ Control System features a variable pump control that, when used with a variable speed pump, maintains a user-chosen temperature rise between the inlet and outlet of the boiler.

- Maintains user chosen temperature rise between boiler inlet and outlet.
- Operates in degrees, Fahrenheit or Celsius, user selectable.
- User selectable Delta T settings.
- Protective enclosure.
- Proprietary Boiler System Algorithm: Vari-Prime™ will operate the boiler pump at maximum flow during boiler startup to ensure stable operation is reached before introducing variable water flow. This key feature keeps the boiler's combustion and variable speed pump's flow in phase with each other, protecting the heat exchanger from potential low flow conditions.
- Comes standard on the Laars MagnaTherm condensing modulating boilers
- Available as an optional package on the Laars NeoTherm condensing boiler line.
- In conjunction with a variable speed pump, A Vari-Prime™ installation will track the heating profile curve and dramatically reduce the electrical usage of the boiler pump.
- Vari-Prime™ control logic operates in tandem with Laars modulating boiler combustion controls and the variable speed pumps and drivers that are available on the market today.
- Based on today's energy costs vs. the cost of installing a variable speed pump system can provide an expected payback within one to two years, depending on size of system, heating profile, and regional energy costs.

VARI-PRIME™ CONTROL SYSTEM SPECIFICATIONS

Delta T Settings	15°F (8°C), 20°F (10°C), 25°F (13°C), 30°F (16°C), 35°F (18°C), 40°F (20°C)
Output Types	0-10VDC or 4-20mA
Dimensions	7 3/4" x 6 1/4" x 3 3/4"
Power Voltage	24 VAC
Max Operating Temp	150°F (65°C)

The LAARS Gateway is an external, high performance Building Automation multi-protocol gateway that has been preprogrammed for LAARS' Mascot II, NeoTherm, and NeoTherm LC to support BACnet®1MS/TP, BACnet/IP, Metasys®2 N2 by JCI, Modbus TCP, and LonWorks®3.

Features

- BTL Marked and LonMark Certified
- Field programmable

Standard Equipment

- LER Model Protocol: LonWorks
- RER Model protocols: BACnet MS/TP, BACnet IP, Metasys N2, and Modbus TCP

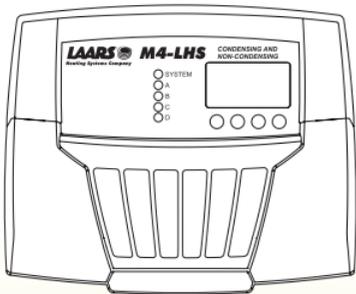

- Laars Gateway RER is based on an ARM9 processor for fast performance and includes two serial ports, one RS-485, and one Ethernet port. BACnet BTL marked (B-ASC)
- Laars Gateway LER includes a LonWorks port plus Ethernet and RS-485 ports. LonMark certified
- Able to interface with up to eight controls on Laars Mascot, NeoTherm, and MagnaTherm product lines
- Interfaces with RS-485, Ethernet, or LonWorks
- DIP switches to select baud rate on RS-485 protocol (9600, 19200, 38400, 57600, or 76800)
- Serial or Ethernet versions support a total of 2400 Host and Field Protocol memory points
- LonWorks versions support a total of 1500 Host and Field Protocol memory points. Voltage Input Multi-mode power adapter: 9-30VDC or 12 – 24VAC

GATEWAY SPECIFICATIONS

Power Consumption @ 12V	RER = 150mA LER = 279mA
Operating Temperature	-40°F to 167°F (-40°C to 75 °C)
Operating Humidity	5-90% RH, non-condensing
Connections	RS-485 Port for BACnet MP/TS or Metasys N2 Ethernet Port for BACnet IP LonWorks Port
Weight	0.4 lbs (0.2 kg)
Dimensions	4.5 L x 3.2 W x 1.6 H inches (11.5 x 8.2 x 4.0 cm)
Surge Suppression	EN61000-4-2 ESD EN61000-4-3 EMC EN61000-4-4 EFT
Approvals	BACnet Testing Labs (BTL) B-ASC-RER Series LonMark 3.4 Certified-LER Series CE (EN55022; EN55024; EN60950) TUV approved to UL 916 standard and CSA C22-2 FCC Class A Part 15 CSA 205 Approved RoHS Compliant DNP3 Conformance Tested OPC Self Certified to Compliance

BACnet Support	BTL Listed BACnet COV's Support up to 2,000 Host & Field points DIP switches are for setting MAC Address, Node-ID, Baud Rate on the RS-485 Field protocol

Warranty	Two years from date of purchase, return to factory

M4-LHS CONTROL FOR CONDENSING, NON-CONDENSING, MODULATION & STAGE-FIRED BOILERS

Laars M4-LHS — Multiple boiler sequencing control with outdoor reset for up to four modulating boilers. Includes system water sensor and well, outdoor air sensor, and clip.

Standard Equipment

- Multiple boiler control, used to lead-lag modulating, stage-fired, condensing, and non-condensing boilers
- Controls up to four stages (one modulating boiler is one stage)
- Ready to use with Laars X-BAC BACnet interface module
- Ready to use with up to two M4EXT extension modules for control of up to 16 modulating stages
- Ready to use with XSIG module to accept external 4-20mA control signal
- Outdoor reset or setpoint control
- System water temperature sensor
- System water temperature sensor well
- Outdoor air temperature sensor
- Outdoor air temperature sensor clip

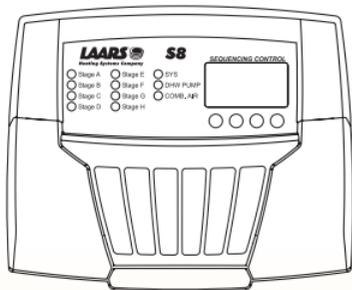

Features

- Operates two groups of boilers — condensing and non-condensing — each with independent configuration — to achieve the highest system efficiency
- Chooses condensing or noncondensing groups based on system temperature
- Controller works with either stagefired or modulated boilers
- Controls 0-5V, 1-5V, 0-10V, 2-10V and 4-20mA boilers, or stage-fired boilers, in any combination
- Lo/Hi/Lo/Hi sequencing fires lag boiler after the lead boiler reaches full fire capacity — Lo/Lo/Hi/Hi sequencing provides an opportunity for higher boiler efficiency to bring on the lowest firings stages of all the boiler before moving any of them to higher firing rates
- Parallel or normal modulation provides efficient, smooth, and adjustable modulation that can fit most applications whether the boilers are to sequence normally (one after another) or in parallel
- Each boiler can be set for one of three rotation modes: timed (one hour to sixty days), manual, or last-on/last-off
- Each boiler can be set individually to be automatically operated, fully on, manually adjusted, off, or be considered a standby boiler. The standby boiler is used as a backup with an adjustable standby delay. This feature is great for using less efficient boilers (with lower initial purchase cost) for periods of high demand only
- Soft-off feature, lag delay and last stage hold assist in minimizing boiler short-cycling
- Adjustable ignition start point and modulation start point
- Adjustable purge delay, feature to match the boiler's pre-purge time
- Adjustable minimum and maximum system temperature protect boilers or system
- Communicates with EMS (energy management system) by adding the XSIG 4-20mA interface module, and has shutdown and prove inputs for the EMS

M4-LHS SPECIFICATIONS

Voltage Input	120VAC 60Hz
Power Consumption	12 VA Max
Operating Temperature	20°F to 130°F
Operating Humidity	20% to 80%
Storage Temperature	-4°F to 180°F
Dimensions	11-3/8" wide x 9-1/4" high x 3-31/4" deep
Weight	2.5 pounds
Lead Boiler Rotation	Time (1 to 1440 hours [60 days]), manual, last-on
Stage Modes	Auto, standby, manual, on, off
Ignition Start Point	1% to 50%
Modulation Start Point	0% to 100%
Switch Between Boiler Group Modes	System/Return Temp
Standby Time (PID only)	1 to 60 minutes
Purge Delay	0.0 to 10.0 minutes Switch between boiler group modes: Outdoor Temp or System/Return Temp
Lag Delay	0 to 60 minutes
Modulating Signals Available	0-5V, 1-5V, 0-10V, 2-10V and 4-20mA
Output Relay Ratings	1 Amp inductive, 6Amp resistive at 120VAC 60Hz, 15A total for all circuits
Pump Outlet	1 N.O. SPST

Temperature Display	Fahrenheit or Celsius
Display	Graphical alphanumeric (7 rows x 21 characters each)
Temperature Sensor Ranges	-35°F to 250°F
Outdoor Cutoff	Range 20°F to 100°F, ON and OFF
SetPoint	70°F to 250°F
External Setpoint	-10°F to 240°F using XSIG 4-20mA interface (optional)
Sequencing Modes	Lo/Hi/Lo/Hi or Lo/Lo/Hi/Hi
Domestic Water	With or without priority
Reset Ratio Range (Outdoor Reset only)	(1:4) to (4:1) (outdoor: system water), and custom ratio
Offset Adjustment (Outdoor Reset only)	-40°F to 40°F
Minimum Target (Outdoor Reset only)	70°F to 170°F
Maximum Target (Outdoor Reset only)	90°F to 240°F
Last Stage Hold (PID only)	0°F to 30°F
Pump Run-On	0 to 360 minutes
Night Setback	0°F to 75°F
Schedules	1 Day and 1 Night (setback) settings per day
Power Backup	Lithium coin battery, 100 days minimum 5 year replacement (maintains clock in power outage)
External Inputs	Shutdown input and prove input (dry contacts only)
Season	Winter and Summer
Modulation Modes	Normal or parallel

S8 — Multiple boiler sequencing control with outdoor reset for up to eight boiler stages — will control on/off, two-stage, and four-stage units.

Standard Equipment

- Multiple boiler control, for up to eight boiler stages
- Ready to use with up to two S8EXT extension modules for control of up to twenty-four boiler stages
- Outdoor reset or setpoint control
- Ready to use with XSIG module to accept external 4-20mA control signal
- System water temperature sensor

Features

- System water temperature sensor well
- Outdoor air temperature sensor
- Outdoor air temperature sensor clip
- Graphics that display in plain English
- Brightly lit LCD, visible with no ambient light

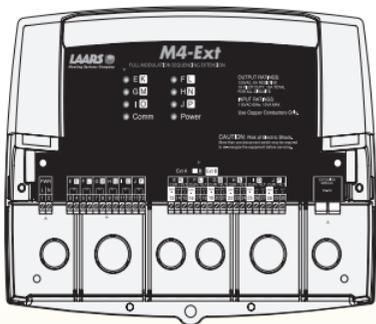

- Can be used with on/off, two-stage and four-stage units
- Each boiler can be set individually to be automatically operated, fully on, manually adjusted, off, or standby.
- Communicates with EMS (energy management systems) by adding the XSIG 4-20mA interface module
- Can be configured for indirect domestic hot water pump control with the additional DHW sensor, or by using a dry contact closure, for a variety of domestic water priority and control options
- Settings are pre-configured, but adjustable
- Three rotation options – timed, manual, or first-on/first-off
- Minimum boiler return feature with optional return sensor
- Adjustable day and night schedule
- PID Lo/Hi/Lo/Hi or Lo/Lo/Hi/Hi sequencing or over-sized-system sequencing with features such as last stage hold, reaction time, or minimum runtime, to minimize short-cycling
- System output relay for system pump with adjustable run-on delay, or combustion air damper with prove for air damper
- Adjustable outdoor temperature cutoff and customizable reset curves
- Internal programming switch protected by locking cover for security against unexpected changes to program
- UL Listed, tested per standard 916
- Boost feature
- Summer shutdown option with domestic water override
- Memory and backup with lithium battery to store information for 100 days

S8 SPECIFICATIONS

Voltage Input	20VAC 60Hz
Power Consumption	12 VA Max
Operating Temperature	20°F to 120°F
Operating Humidity	20% to 80%
Dimensions	11-3/8" wide x 9-1/4" high x 3-3/4" deep
Weight	2.5 pounds
Lead Stage Rotation	Time (1 to 999 hours [41 days]) manual, first-on/first-off
Stage Modes	Auto, standby, on, off
Standby Time (PID only)	1 to 60 minutes
Output Relay Ratings	2 Amp inductive at 120 VAC 60 Hz
Add-on Extension Panels	Up to two S8EXT panels using included RS485
Temperature Display	Fahrenheit or Celsius
Display	Graphical alphanumeric (7 rows of 21 characters)
Temperature Sensor Ranges	-35°F to 250°F
Outdoor Cutoff Range	20°F to 100°F, ON and OFF
Set Point	-10°F to 240°F
External Set Point	-10°F to 240°F using XSIG 4-20mA interface (optional)
Reset Ratio Range (outdoor reset only)	(1:4) to (8:1) (outdoor : system water) and custom ratio

Offset Adjustment (outdoor reset only)	-40°F to 40°F
Minimum Target (outdoor reset only)	70°F to 170°F
Maximum Target (outdoor reset only)	90°F to 240°F
Reaction Time (PID only)	1 to 10 minutes
Min. Run-Time (PID only)	80°F to 140°F
Purge Delay (PID only)	0.0 to 10.0 minutes
Last Stage Hold (PID only)	0°F to 30°F
Throttle Range (OSS only)	2°F to 20°F
Domestic Hot Water Priority Options	Parallel piping w/ or w/out priority
Pump Run-On	0 to 60 minutes
Pump Exercise	Yes or no
Schedules	1 day and 1 night (setback) setting
Night Setback	0°F to 80°F
Power Backup	Lithium coin battery, 100 days min (maintains clock in power outage)
External Inputs	Shutdown input and prove input (d
Seasons	Winter and Summer

M4 EXT EXTENSION MODULE FOR M4-LHS CONTROLS

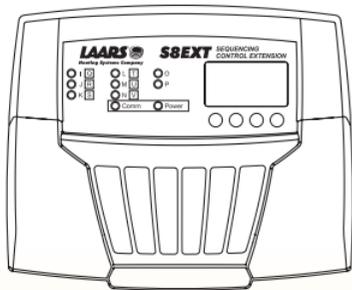

Extension module for M4-LHS control, to add 6 more boilers to the control system. Includes RS485 connection cable. Up to two M4 EXT modules can be used with one M4 control, for control of up to 16 boilers from the same system.

- Easily connects to any M4-LHS and additional M4 EXT panels or XSIG interface modules
- Additional stages easily added by using the included RS485 cable
- Six N.O. Boiler startup relay outputs. Each is wired in series with each boiler's limit circuit.
- UL listed, tested per standard 916
- LED indicators display associated relay status for easy diagnostics.
- The M4 EXT can operate up to six 0-10 V, 4-20 mA (or split signal) modulating boilers, in any combination
- M4 EXT can be used in Hybrid Systems with condensing, non-condensing, modulating, and/or stage-fired boilers

M4 EXT SPECIFICATIONS

Voltage Input	120 VAC 60 Hz
Power Consumption	12 VA Max
Operating Temperature	20°F/-6°C to 130°F/54°C
Operating Humidity	20% to 80% non-condensing
Dimensions	11" W x 9" H x 3 ¾" D
Weight	2.5 pounds
Switch Between Boiler Groups Mode	Using Outdoor Temperature or System/Return Temperature
Lead State Rotation	Time (1 to 1440 Hours (60 days)), Manual, Last-On
Pump Output	1 N.O. S.P.S.T.
Modulating Boiler Modes	Auto, Manual, Standby, On, Off
Staging Boiler Modes	Auto, Standby, On, Off
Standby Time	1 to 60 minutes
Modulating Output Types	4-20mA, 0-5V, 0-10V, 1-5V, 2-10V
Sequencing Output Types	On/Off, 2-Stage, 3-Stage, or 4-Stage
Output Relay Ratings	1 Amp inductive, 6 Amp resistive at 120 VAC 60 Hz, 15A total for all circuits
Add-On M4-Extension Panels	up two M4-Extension Panels using RS485
Ignition Point %	1 to 50%
Modulation Start Point %	0 to 100%
Modulation Modes	Normal or Parallel
Sequencing Modes	Lo/Hi/Lo/Hi or Lo/Lo/Hi/Hi
Temperature Display	Fahrenheit or Celsius

Display	Graphical Alphanumeric (up to 7 rows x 21 char. Each)
LED	1 System Output relay, 4 Boiler Output relays
Sensor Ranges	Outdoor temperature sensor — minus 35°F/-37°C to 250°F/121°C Heating system sensor— minus 35°F/-37°C to 250°F/121°C
Outdoor Cutoff Range	20°F/-6°C to 100°F, ON and OFF
Reset Ratio Range	(1:4) to (4:1) (Outdoor: System Water)
Minimum Water Temperature	70°F/21°C to 170°F/77°C
Maximum Water Temperature	90°F/32°C to 240°F/116°C
Domestic Hot Water	with Priority or without Priority
Pump Run-On	0 to 360 minutes
Purge Delay	0.0 to 10.0 minutes
Lag Delay	0 to 60 minutes
Last Stage Hold	0 to 30°F
Schedules	1 Day and 1 Night (Setback) setting per day
Night Setback	0F°/0C° to 75F°/42C°
Power Backup	Lithium coin battery, 100 days minimum 5 year replacement (Maintains Clock in power outages)
External Inputs	Shutdown, Tstat, and Setback Input, and Prove and DHW Call Input. (Dry Contacts Only)
Season	Winter and Summer

Standard Equipment

- Extension module (used with Laars S8) for up to eight additional boiler stages
- Ready to use with RS485 cable (included)

Features

- Easily connects to S8, another S8EXT, and XSIG with RS485 cables
- Can be used with on/off, two-stage and four-stage units

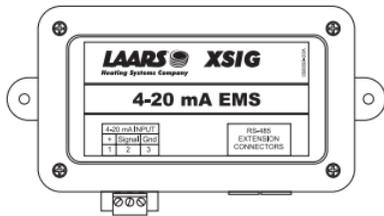

- A-B switch for identification when two S8 EXT units are used
- UL Listed, tested per standard 916

S8 EXT SPECIFICATIONS

Extension Numbering	Toggle switch A or B
LED	1 power: (dual color green (A)/red (B)), 1 comm: 8 stage output relays (dual color green (A)/red (B))
Stage Outputs	8 N.O. SPST
Output Relay Ratings	2 Amp inductive at 120 VAC 60 Hz

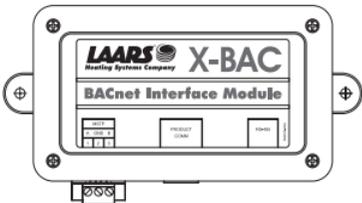

Connection to S8 and Another S8EXT	Two RS485
Operating Temperature	20°F to 120°F
Operating Humidity	20% to 80%
Dimensions	11-3/8" wide x 9-1/4" high x 3-3/4" deep
Weight	2.5 pounds

XSIG 4-20MA INTERFACE MODULE

The XSIG Interface provides the M4 and S8 series controls with the capability of receiving an external set point as a 4-20mA signal through an Energy Management or Building Management Systems (EMS/BMS).

- Module easily connects with the S8 or M4 controls and extensions.
- Connects to the M4 or S8 via included RS485 connection cable.
- The M4 and the S8 controls can be shutdown by the EMS/BMS system.
- The control, XSIG Interface, and two Extensions can be connected in series using the RS485.
- The XSIG Interface can source the current for the 4-20mA input signal, providing an excitation DC current.

X-BAC interface module allows a BACnet system to have communication with Laars M4-LHS multiple boiler controls and easily connects to M4-LHS with RJ45 (ethernet) cables.

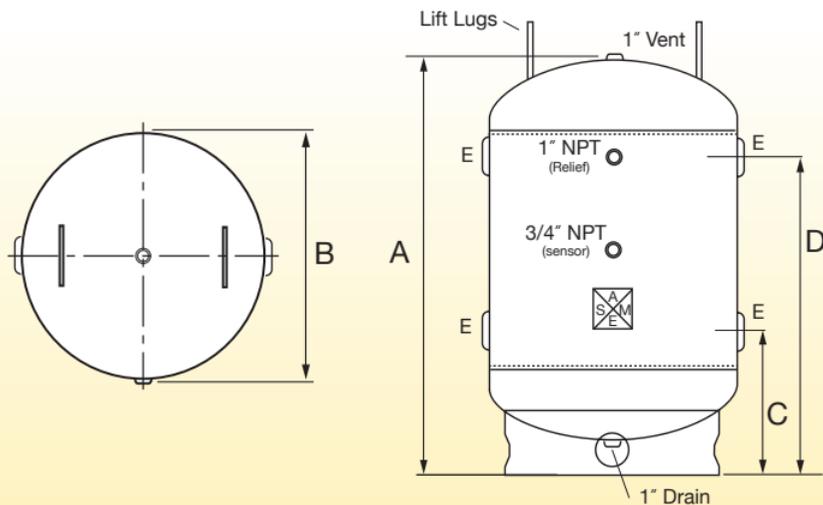

Available to the BACnet system from the M4-LHS, through the X-BAC:

- Operation mode
- Outdoor temperature
- System temperature
- Output status
- Control status
- Season
- Reset ratio
- Offset
- Outdoor cutoff
- Minimum water temperature
- Maximum water temperature
- Setback
- Purge delay
- System run-on
- Rotation time
- Standby time
- Last stage hold
- Condensing unit lead stage
- Non-condensing unit lead stage
- Reaction time
- Minimum run time
- Gain
- Lag delay
- Soft off
- Set time
- Day schedule
- Night schedule

THIS PAGE INTENTIONALLY LEFT BLANK.

HYDRAULIC SEPARATORS

The Laars Hydraulic Separator tank is designed help reduce short cycling of a boiler system and separate building and boiler circulation. The Laars Hydraulic Separator uses stored boiler water to buffer the system load when the boiler is producing more BTU's than what the building can handle. When the building has a minimal demand, it pulls from the tank allowing the boiler to "rest". The Hydraulic Separator is piped so the building flow is separate from the boiler flow, allowing independent circulation.

Standard:

- ASME Sec. VIII, Div 1
- 125 psi
- Bare tank
- 5 year warranty
- 4" base ring

Optional:

- Hand hole
- Manway
- Topcoat R-16 insulation
- Painted Steel Jacket
- Additional fittings

Laars Hydraulic Separators are designed for 125 psi (150 optional). Standard sizes range from 120 gallon up to 860 actual gallons. Custom sizes and additional fittings are available.

COMMERCIAL JACKETED ENERGY SAVER STORAGE TANKS

Designed for moderate, commercial peak demands, light duty jacketed storage tanks are available in 80, 120, and 200 gallon capacities. Applications include use with boilers, hot water circulation systems, and where large dump volume is required.

- Heavy gauge steel automatically formed, rolled, and welded
- Exclusive ceramic porcelain-like lining protects storage tank from corrosion
- ASME construction available. 200-gallon models come standard with ASME construction
- 2" NPT factory-installed true dielectric waterway fittings extend water heater life
- 120 and 200-gallon ASME models have 2-1/2" connections
- 2" NPT spud allows for a rear water connection (120 gallon models only)
- Hand hole cleanout
- Two protective magnesium anode rods
- 2" Non-CFC foam insulation
- T&P relief valve opening (T&P not supplied)
- 3/4" NPT aquastat fitting
- Brass drain valve

LAARS® COMMERCIAL CHILLED WATER BUFFER TANKS

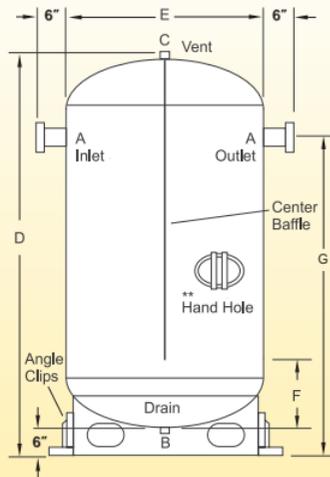

Chilled Water Buffer Tanks from Laars® Heating Systems are designed to increase water volume capacity, in relation to the chiller capacity. Low water volume systems may require additional buffer capacity to eliminate excessive chiller cycling, poor temperature control, or erratic system operation. A Chilled Buffer Tank can buffer the system volume.

- Custom sizes available upon request
- Can be ordered in vertical or horizontal orientation
- Tanks constructed and certified in accordance with ASME Section VIII, Div. I Code, rated for 125 psi at 450°F
- Horizontal tanks are supplied with sparging tube
- Horizontal tanks are same size as vertical tanks

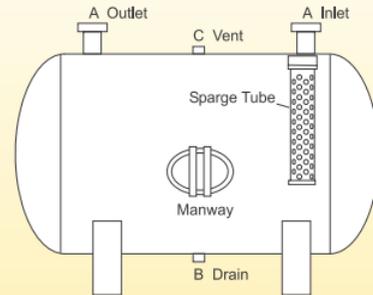

- Eliminates excessive chiller cycling, poor temperature and erratic system operation
- Stabilized water temperature return
- Red oxide shop primer exterior standard
- Spray foam insulation, R-16 value with acrylic top coat available

** Hand Holes required on tanks above 36" diameter.

Sparging Tube mixes and disperses water evenly

CUSTOM STORAGE TANKS 30" TO 48" DIA. 193 TO 1316 GALLONS

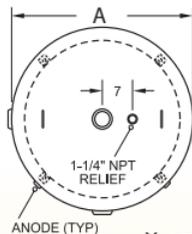

Bare

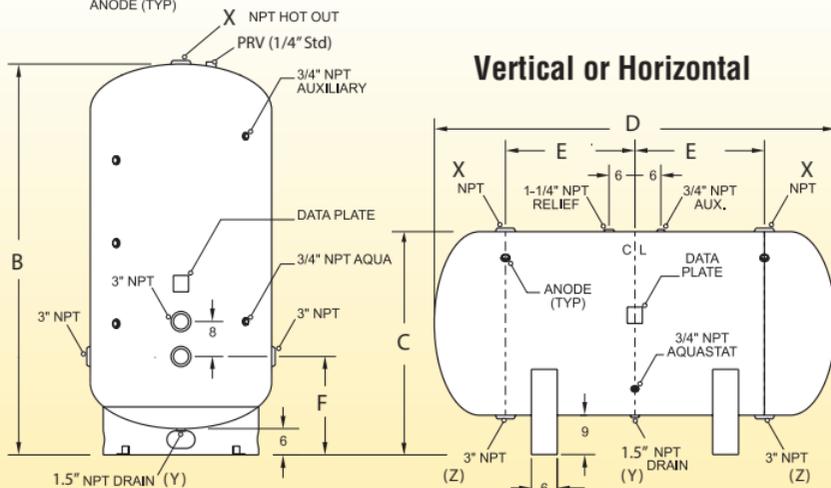

- Vertical or Horizontal Construction
- Horizontal models require two saddles and have two additional 3" (7.6 cm.) NPT fittings
- Heavy gauge steel primed with a red oxide color (Bare tanks only)

Available in 30" through 48" standard diameters, these large volume, bare tanks offer capacities ranging from 193 to 1,316 gallons. Horizontal and vertical configurations as well as custom sizes are available.

- Tanks are lined with an exclusive enamel formula to provide superior protection from corrosion
- Two female 3" (7.6 cm.) NPT water connection fittings are located on the front for ease of installation
- Additional size fittings are available as an option
- Magnesium anode rods provide added protection against corrosion
- One 3/4" (1.9 cm.) NPT aquastat fitting
- Lifting lugs — standard
- Optional hand hole cleanout — 4" x 6" (10.2cm. x 15.2 cm.) diameter
- Optional manway — 12" x 16" (30.5 cm. x 40.1 cm.) diameter
- Optional stainless steel, dielectrically isolated recirculation tube minimizes turbulence and maximizes hot water delivery
- Designed for storage of potable water up to 180°F (82°C)
- All tanks are constructed and certified in accordance with ASME Sect. IV, Part HLW for 125 psi (862 kPa). 150 psi (1034 kPa) is available as an option
- 5-year limited steel tank warranty

CUSTOM JACKETED STORAGE TANKS

Available in 30" thru 60" standard diameters, these large volume, insulated and jacketed tanks offer seven capacities ranging from 193 to 1689 gallons. Two inch, high-density foam insulation minimizes heat loss.

Jacketed

- Sturdy heavy gauge steel jacket
- 2" High Density Foam Insulation — Covers the side and top of tank, reducing the amount of heat loss
- Optional Hand hole Cleanout — 4" x 6" (10.2cm. x 15.2 cm.) diameter
- Optional manway — 12"x16" (30.5 cm. x 40.1 cm.) diameter
- Optional stainless steel, dielectrically isolated recirculation tube minimizes turbulence and maximizes hot water delivery
- Tanks are lined with a exclusive enamel formula to provide superior protection from corrosion
- Two female 3" (7.6 cm.) NPT water connection fittings are located on the front for ease of installation
- Additional size fittings are available as an option
- Magnesium anode rods provide added protection against corrosion
- One 3/4" (1.9 cm.) NPT aquastat fitting
- Designed for storage of potable water up to 180°F (82°C)
- All Tanks are constructed and certified in accordance with ASME Sect. IV, Part HLW for 125 psi (862 kPa). 150 psi (1034 kPa) is available as an option
- 5-year limited steel tank warranty

RIGID FOAM STORAGE TANKS

Refer to pages 109 and 111 for standard sizes
Call 1.800.900.9276 for our extended custom tank selection

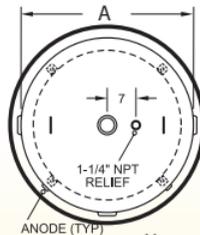

Rigid Foam

- SPF meets requirements for California Title 24.
- The 100% acrylic topcoat is formulated for applications over spray polyurethane foam
- Alternative for insulated and steel jacket
- Any tank size or shape can be insulated
- Field repairable
- Vertical or Horizontal construction

Custom storage tanks with sprayed-on, rigid Polyurethane foam (SPF) insulation and acrylic topcoat exceed ASHRAE 90.1 requirements with 2.25" of high-density polyurethane foam with an "R" value of R-16. Spray foam insulation has the best fire spread rating with a class I foam with less than a 25-flame spread rating suitable for boiler room applications.

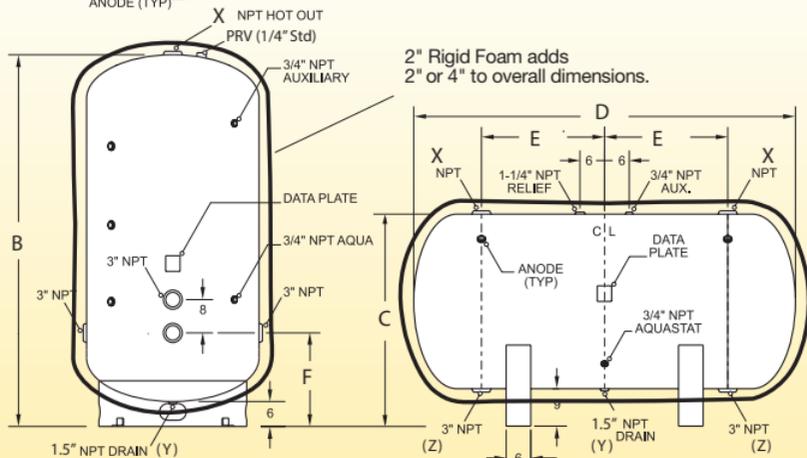

- Horizontal models require two saddles and have two additional 3" NPT fittings
- Tanks are lined with an exclusive enamel formula to provide superior protection from corrosion
- Two female 3" (7.6 cm.) NPT water connection fittings are located on the front for ease of installation
- Magnesium anode rods provide added protection against corrosion
- One 3/4" (1.9 cm.) NPT aquastat fitting
- Lifting lugs — standard
- Optional hand hole cleanout — 4" x 6" (10.2cm. x 15.2 cm.) diameter
- Optional manway — 12" x 16" (30.5 cm. x 40.1 cm.) diameter
- Optional stainless steel, dielectrically isolated recirculation tube minimizes turbulence and maximizes hot water delivery
- Designed for storage of potable water up to 180°F (82°C)
- All tanks are constructed and certified in accordance with ASME Sect. IV, Part HLW for 125 psi (862 kPa). 150 psi (1034 kPa) is available as an option

EXPANSION BLADDER TANKS

- Factory charged at 12 psi.
- Dried to -50 dew point
- For use with non-potable water
- Heavy duty replaceable bladder
- Max temperature 240 degrees F
- Red oxide primer paint
- Large flanged opening for easy bag replacement
- Carbon steel construction
- Can be used with glycol systems
- ASME code Sec VIII, Div 1
- 1 Year warranty
